RE: Docket No. 07-16 (Free High Speed Internet for all Americans)

Dear Mrs. Secretary:

I am writing to you to express my support for the M2z Networks' proposal to provide universal broadband access. I lived in Romania until 1990 and I still keep in touch with friends and family in Eastern Europe. Surprisingly, the United States lags many European countries in access to broadband. That shouldn't be!

I strongly believe in competition and think the cable and phone companies have maintained a stranglehold on the high speed Internet access market. Approving M2Z's application will bring about better access, lower prices and improved customer service.

I hope you'll vote in favor of this proposal.

Sincerely,

Chris Adelman

CC: FCC ~~Chairman~~. Kevin Martin

RE: Docket No. 07-16; Petition for free wireless internet

Dear Secretary Dortch:

As someone who recently **started** my own advertising agency, I **am** writing to **ask** you for your support of M2Z Networks' **proposal** to provide **free** broadband to the country. Entrepreneurs like me **assume** a **great** deal of **risk** and sometimes don't experience a return on **investment** for **years**. I could not **imagine** starting my venture **without** high speed Internet access because a **majority** of my work requires **me** to review video material online, **and** cannot wait precious time **waiting** for the video stream to buffer and **load**. Fortunately, I can afford the monthly cost. Other small business colleagues I know, however, **are not as** fortunate.

I strongly support M2Z's proposal (docket #07-16) **and** hope that the FCC will approve the company's application

Sincerely,

Ricky Mintz, President/ Owner

CC: FCC Chairman, Kevin Martin
FCC Commissioners: Copps, Adelstein, Tate, McDowell

RE: Docket No. 07-16 (Free Broadband)

Dear Mrs. Secretary:

I am writing to express my support for providing a free, wireless broadband service to all Americans. In my opinion, no single innovation in the past century has changed the face of business like the Internet. Businesses like mine that operate in a global marketplace have come to rely on the Internet for day-to-day operation, online marketing, product delivery and communication.

The United States is a global leader in so many things but, sadly, broadband access is not one of them. We lag behind many countries in Asia and Europe and I strongly believe the FCC needs to do more to enable all American businesses and consumers to reap the benefits of high speed Internet access.

I understand there's a proposal currently before you that would allow M2Z Networks to provide free, wireless broadband to 95% of America. I'm all for this idea and urge the FCC Commissioners to approve it, as free wireless broadband will enhance our global competitiveness and improve our quality of life.

Sincerely,

Steven Garfinkel
President

RE: Docket No. 07-16; Petition for free Wireless internet

Dear Secretary Dortch:

As an American small business owner, I am writing to ask you for your support of M2Z Networks' proposal to provide free broadband to the country. If you examine the statistics, most small businesses assume a great deal of risk in the early years, and in many cases must invest for years without seeing a significant return on investment. Obviously, no business today can survive without broadband access, which is just another expense to stand in the way of our success.

M2Z's proposal, which your commission is currently reviewing, calls for *Gee* high speed internet access for all Americans. Unlike government proposed solutions, M2Z's plan is affordable and beneficial in numerous ways. Small business owners, schools, rural areas of America and parents are among those who would welcome fast, free and family-friendly high speed Internet access.

I ask you to strongly consider the need for greater broadband access when weighing in on this innovative proposal. Thank you for your time and consideration.

Sincerely,

Jordan Levy, President

RE: Docket No. 07-16 (Free High Speed Internet for all Americans)

Dear Mrs. Secretary:

One of my friends told me about a campaign to bring free, high speed Internet access to America. As a small businessman, high speed Internet through wireless broadband makes good business sense to me.

Broadband is a vital part of my business. Whether I am reviewing media clips, movie trailers or music from emerging or established artists, I cannot afford to wait for digital files to load. Speed is crucial to saving time and money.

I hope the FCC will take a more visionary approach and do all it can to promote the rapid deployment of high speed Internet access.

Sincerely,

Barry Krutchik
President
Krutchie Entertainment

RE: Docket No. 07-16 (Free High Speed Internet for all Americans)

Dear Mrs. Secretary:

The Internet has become a vital part of my company's way of doing business. It is hard to believe there were days when I had to dial up. Cable, phone and Wi-Fi have brought high speed Internet access to parts of the country but it seems there a digital divide that must be narrowed.

I understand that there is a petition by M22 Networks to provide free, universal broadband. I am very much in favor of this proposal. It would be great if more people had access to nationwide broadband.

Please vote to make high speed broadband a reality.

Sincerely,

Robert Neckman
